

EMERGENCY

Official Journal Of Emergency Medicine Group of Shahid Beheshti University of Medical Sciences

General Information

Full Name: Emergency

Owned and Published by: Emergency Medicine Department of Shahid Beheshti University of Medical Sciences

Language: English

Frequency: Quarterly

Availability: Open access

Rank: Scientific-research

Adhere to: International Committee of Medical Journal Editors (ICMJE), Committee on Publication Ethics (COPE)

Established: 2013

ISSN: 2345-4563

eISSN: 2345-4571

Language editors

Majid Abdolrahimi

Mahrou Sadri

Editorial

Editor-in-Chief: Iraj Najafi, MD

Chairman and Deputy Editor: Saeed Safari, MD

Editorial Manager: Hamid Kariman, MD

Executive Director: Behrooz Hashemi, MD, Farhad Rahmati, MD

Product Manager: Mahmoud Yousefifard, Ph.D

Associate Editorial (A-Z):

Description

The "Emergency" is a peer-reviewed scientific journal.

Website

The articles of the journal are available at: <http://journals.sbmu.ac.ir/emergency>

Distribution

This is an International journal published in electronic/online.

Publication Charges

This is an open access journal and there are no charges for publication in this Journal.

Period of Publishing & Frequency

Since June 2013, this journal has been published on a quarterly basis (a volume of 4 issues per year).

Abstracting & Indexing

Author Guidelines

Focus and scope:

Emergency is an international, peer-reviewed journal dedicated to improve the quality of care and emergency knowledge by publishing the high quality activities concerned with emergency medicine and related medical specialties. Emergency publishes the articles on critical care medicine, disaster and trauma management, environmental diseases, toxicology, pediatric emergency medicine, emergency medical services, emergency nursing, health policy and ethics, and other related topics. The Journal supports the following types of articles:

- Original/Research Article
- Review Article
- Brief Report
- Case-Report
- Letter to Editor
- Photo Quiz

Peer-review process:

All submissions will be refereed by two reviewers during maximum two weeks according to specific research reporting guidelines for different study designs. All authors should send their revised manuscripts within 2 weeks. Reviewers' and authors' identities are kept confidential. The existence of a submitted manuscript is not revealed to anyone other than the reviewers and editorial staff.

Submission process:

Title page and manuscript text file should be separately submitted online via the online submission system.

Manuscript preparation:

1- Summary (for busy authors)

Title page, Including title of article, author's names and affiliations and detail information of corresponding authors; Phone and Fax number, Email and postal address should be supplied and submitted as a separate file.

Manuscript text file, Should be prepared according to specific research reporting guidelines; it includes CONSORT for randomized trials, STROBE for observational studies, PRISMA for systematic reviews and meta-analyses, and STARD for studies of diagnostic accuracy. In addition, Appendix section including acknowledgment, funding, and author's contribution should be addressed at the end of the manuscript text in all types of above mentioned studies.

2- Detail

The journal adheres to the conditions as stated by the International Committee of Medical Journal Editors (IC-MJE). The main manuscript should carry the title, abstract, main text, acknowledgment, funding, author's contribution, references, figures, and tables of the paper. The preferred word processing format for the manuscript file is Microsoft Word. Manuscripts should be double-spaced, with 2.5-cm margins on all sides of the paper. All abbreviations must be spelled out the first time they are used, followed by the abbreviated form in parentheses. Units of measurement must be complied with the International System of Units (SI). Between 3 and 5 key words should be typed for indexing at the end of the abstract for each manuscript. These words should be identical to the medical subject headings (MeSH) that appear in the Index Medicus of the National Library of Medicine.

Observational Studies

Cohort, case control, and cross-sectional studies should be arranged based on strengthening the Reporting of

Observational studies in Epidemiology (STORBE) statement and checklist as: Abstract, keywords, Introduction, Methods, Results, Discussion, Conclusion, Acknowledgements, References, Tables, and Figures. A structured abstract (with the subheadings Title, Introduction, Methods, Results, and Conclusion) should appear on the first page of the manuscript and should not exceed 350 words. The main text (excluding the abstract and references) should not exceed 3500 words.

Clinical Trials

Original research papers that report a randomized controlled trial, should comply with the guidelines provided by the Consolidated Standards of Reporting Trials (CONSORT) group. Also, supplying the manuscript with a CONSORT flowchart diagram is highly encouraged. Researchers who would like to publish reports of their clinical trials in *Emergency* are strongly encouraged to register their studies in a registry of clinical trials proposed by the World Health Organization or the International Committee of Medical Journal Editors. As an option, the Iranian Registry of Clinical Trials is a registry suggested by the World Health Organization.

Reviews

Review articles should be composed of systematic critical assessments of literature and data sources pertaining to clinical topics, emphasizing factors such as cause, diagnosis, prognosis, therapy, or prevention. They should have unstructured the abstracts. All articles and data sources reviewed should include information about the specific type of study or analysis, population, intervention, exposure, and tests or outcomes. Authors of review articles should be expert and have contribution in the field of the addressed subject. Systematic reviews and meta-analyses should be prepared based on Preferred Reporting Items for Systematic Reviews and Meta-Analyses (PRISMA).

Case Reports

Case reports should be arranged as follows: Abstract (unstructured, not exceeding 200 words), Introduction, Case Report, Discussion, References, and Figures. The length should not exceed 1000 words.

Brief Reports

Original research papers can also be published in a brief format. Submitted papers that are of interest but are not acceptable as a full-length original contribution are offered by the editor to be published in this section. Also, the authors can primarily submit their papers for consideration of publication in this section. An unstructured abstract not longer than 150 words is required for this section. The body of the manuscript should not exceed 1500 words, and no heading or subheading should be used. Tables and/or Figures should be limited to 2 ones and references to 15 in maximum.

Letters to the Editor

Correspondence will be considered for publication if it contains constructive criticism on previously published articles in the *Emergency*, the authors of which will have the right of reply. Also, reports of limited research or clinical experiences can be submitted in the form of a letter. The length should not exceed 700 words.

Photo Quiz

Photo quiz should be arranged as follows: Pictures of the patient, brief case presentation followed by question as "what is your diagnosis", diagnosis, and discussion. It should be up to 1500 words. The maximum number of pictures is six. Number of references should not exceed 10.

Appendix:

Conflict of Interest

Authors are expected to disclose any commercial associations or sources of support that might pose a conflict of interest in connection with the submitted article. All funding sources supporting the work must be acknowledged in a footnote on the title page. All affiliations with or financial involvement in any organization or entity with a direct financial interest in the subject matter or materials of the research discussed (e.g., employment, consultancies, stock ownership or other equity interest, patent-licensing arrangements) should be cited as conflict of interest at the end of manuscript text file.

Authors' contribution

The ICMJE recommends that authorship be based on the following 4 criteria:

- Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- Drafting the work or revising it critically for important intellectual content; AND
- Final approval of the version to be published; AND
- Agreement to be accountable for all aspects of the work to ensure that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

References:

Our reference style requirements are in accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals by the ICMJE. Number references in the order in which they appear in the text; do not alphabetize. In text, tables, and legends, identify references by Arabic numerals in parentheses.

Note: List all authors when there are six or fewer; when there are seven or more, list the first three, followed by "et al"

Samples:

- Articles in journals

Stratton SJ. Should Helicopters Dispatched for EMS Trauma Response Be Grounded? *Ann Emerg Med.* 2013; 61(2): 167-74.

- Articles in journals with more than 6 authors

Newgard CD, Schmicker, RH, Hedges JR, et al. Emergency medical services intervals and survival in trauma: assessment of the "golden hour" in a North American prospective cohort. *Ann emerg med.* 2010; 55(3):235-46.

- Article In press

Sakles JC, Patanwala AE, Mosier JM, Dicken, JM. Comparison of video laryngoscopy to direct laryngoscopy for intubation of patients with difficult airway characteristics in the emergency department. *Int Emerg Med.* 2013. [In press].

- Article In other language

Gholami A, Barati M, Vahdani M, Vahdani H, Karimi M. Pattern of Empirical Antibiotic Administration in Emergency Department of an Educational Hospital in Tehran. *Razi Journal of Medical Sciences.* 2011; 18(82):17-23. [Persian].

- Books and other monographs

Marx JA, Hockberger RS, Walls RM, Adams GA. Rosen's emergency medicine: concepts and clinical practice. 6th ed. Philadelphia: Mosby Incorporated; 2010. p. 1215-75

Figures and Tables:

Figures and Tables should be kept to a necessary minimum and their information should not be duplicated in the text. Tables and Figures should be typed on separate sheets of the manuscript file, be numbered (with Arabic numbers), and have a title, include double-spaced legends (maximum length, 60 words) on separate pages.

Responsibility and ethical requirements:

Author(s) should certify that neither the submitted manuscript nor any other one with substantially similar content under their authorship in any language has been published or being considered for publication elsewhere. The corresponding author takes responsibility for the integrity of the work as a whole, from inception to published article. In the event that an author is added or removed from the list of authors, written acceptance, signed by corresponding author, must be submitted to the editorial office. Sources of financial support of the project should be acknowledged. If the study involves human beings, the author(s) must include a statement that the study was approved by the local ethical committee and that informed consent was obtained from the study participants. For those investigators who do not have formal ethics review committees, the principles outlined in the Declaration of Helsinki should be followed. All relevant permissions to cite the unpublished observations of others must be obtained by the manuscript author(s). The names and initials of these persons must be cited in the text, and permission from the original author(s) must be obtained. Permission must also be obtained to reproduce or adapt any figures or tables that have been published previously.

The Emergency conforms to the international regulations against scientific misconduct include fabrication, falsification, plagiarism, and etc. Any cases of suspected misconduct will be assessed during the peer-review and publication process based on the guidelines of the Committee on Publication Ethics (COPE).

Submission Preparation Checklist

As part of the submission process, authors are required to check off their submission's compliance with all of the following items, and submissions may be returned to authors that do not adhere to these guidelines.

1. The submission has not been previously published, in any languages, nor is submitted to another journal for consideration.
2. The text adheres to the stylistic and bibliographic requirements outlined in the Author Guidelines, which is found about the Journal.
3. The authors have no commercial associations or sources of support that might pose a conflict of interest.
4. Authors with a potential conflict of interest have been cited in the appendix section at the end of manuscript text file.
5. Authors' contributions have been stated in the appendix section to emphasize each author's responsibility to stand by the integrity of the entire work.
