

Supplementary Data. 1. Comparative analysis of the effects of different concentrations of DOX+L630/810 nm on viability of HT29 cells. Data are expressed as mean $\pm$ SD and percentages to the control

Supplementary Data. 2. Comparative analysis of the effects of different concentrations of DOX+PDT on viability of HT29 cells. Data are expressed as mean $\pm$ SD and percentages to the control

Supplementary Data. 3. The comparative analysis of membrane lipid peroxidation rates in different treatment groups. Data are expressed as mean $\pm$ SD (***) $P < 0.05$ level)

Supplementary Data. 4. . The comparative analysis of LDH release in different treatment groups. Data are expressed as mean $\pm$ SD

Supplementary Data. 5. The comparative analysis of CAT activity in different treatment groups. Data are expressed as mean $\pm$ SD
