1. Introduction

Men's Health Journal (MHJ) is a Peer-reviewed journal that started working under the chairmanship and editorship of Dr. Jalil Hosseini, (MD, Professor of Urology) since 2017. MHJ journal is one of the journals at Shahid Beheshti University of Medical Sciences, Tehran, Iran. MHJ's mission is to study all aspects of Men's health and illness (Research, Clinical, and Theoretical articles). 18 articles published in 2022, have been authored by more than one hundred researchers from countries, including the United States, India, and Iran such as Shahid Beheshti University of Medical Sciences, Tehran University of Medical Sciences, "Isfahan, Urmia, Ahvaz, Ardabil, Hamedan, Semnan, Shahrood" University. The articles submitted in 2022 have been reviewed by more than a hundred reviewers, and we appreciate the reviewer who cooperated with the journal to improve the quality of the articles.

In this article, intend to provide an overview of our publications in 2022, so that we can provide a brief report on our performance to readers and authors, which they might find

useful in becoming more familiar with the journal.

Men's Health Journal is indexed in SID, Index Copernicus, DOAJ, and some other databases specified on the journal's website and the articles are published in them. The acceptance rate has been 80.62% and the rejection rate has been 19.38% (desk reject rate: 2.50%, post-review reject rate: 13.12%, other reject rate: 3.75%) in 2022, and deciding to accept the articles has taken an average of 52 days. Out of the 18 published papers, 14 were original articles, 3 were review articles, and 1 was a letter to the editor (figure 1).

All published articles were matching to the aim and scope (all aspects of men's health) of the journal such as: Urology, Andrology, Cardiology, Endocrinology, Oncology, GI, Nutrition, Genetics, Neurology, Pulmonology, Trauma, Gerontology, Psychiatry, Psychology, Sexual and Reproductive medicine, Public health, Occupational Health, Mental health and wellbeing, Environmental Health, HIV/AIDS/STIs, nursing, Epidemiology and Biostatistics, Psychological & Behavioral issues related to men, Health promotion, prevention, and lifestyle, Marginalized male populations such as incarcerated men, homeless men, homosexual men, and minorities.

As the Covid-19 pandemic was still a topic and there were still unknown aspects about the disease, researchers wanted to report new findings about the disease and its patterns and consequences. Three articles (13.66%) were related to

COVID-19. Assessment of Social Distance between Customers in Urban Hypermarket during COVID-19 Pandemic by Simulation Approach (1), Assessing the Relationship between Serum Testosterone Levels and COVID-19 Outcomes in Admitted Patients (2), New Insight of microRNAs & Short interfering RNA in Treatment of COVID-19 (3).

14 articles were original research papers (77.77%), Studies included: The Father's Role in Parenting(4), Association of Prostate-Specific Antigen Density and Gleason Score of Positive Surgical Margin with Biochemical Recurrence in Prostate Cancer (5), Prevalence of Atypical Infections in Male Patients with Chronic Pelvic Pain (8), Relationship between Sports Aggression and Sports Mindfulness with Sports Self-efficacy in Male Athletes (6), Evaluation of men's knowledge, attitudes, and performance toward Prostate Cancer (7), Erectile Dysfunction and Low Serum Testosterone in Indian Diabetic Men (9), Evaluation of Emotional Divorce in Male Patients with Urethral Distraction Defect (10), Evaluating the prevalence of nephrolithiasis in kidney transplant recipients admitted (11), Real-Time Video-assisted Intraoperative Neuromonitoring in Vestibular Schwannoma Surgery (12).

one article was a letter to the editor (5.55%) with the subject "Premature Ejaculation" (13), and three articles were review studies (16.66%) with subjects, Prevalence of Anxiety Disorders in Iranian Men in the Last 10 Years (14), A Review of Post-operative Pain Management of Hallux Valgus Procedures (15).

The goal of MHJ is to play a role in helping physicians and researchers by publishing new and valuable articles, which can improve Men's general health in societies. Therefore, we invite all authors to publish articles and We thank the authors who submitted their valuable works in this journal in 2022.

We try to index the journal in reliable databases and take a step forward by reducing the waiting time for the publication of the article.
