Supplemental Table. Top: Locations and Medicare fee-for-service enrollee populations of HSAs that were the least prosperous in 2000 but improved by at least two prosperity quintiles by 2015 ($n=39$). Enrollee populations as reported by the datasets for calculating medical and surgical discharges. Average post/pre population ratio is 0.71 ± 0.03 (95% CI) Bottom: HSAs that were the most prosperous in 2000 but declined by at least two prosperity quintiles by 2015 ($n=14$). Enrollee populations as reported by the datasets for calculating medical and surgical discharges. Average post/pre population ratio is 0.78 ± 0.17 (95% CI).
